Invest in Youth !

I have known and watched with deep interest the work of Y. M. C. A. in India and abroad for over thirty years, and have been greatly impressed by its excellent record of humanitarian service. Its facilities are open to all communities, castes and creeds. For over one hundred years the Y.M.C.A. has served Indian youth with general approval and public support. Dr. Rajendra Prasad is the Patron of the New Delhi Y. M. C. A.

To meet and fulfil the increasing needs and demands of young men and boys in this metropolis, it is necessary to enlarge its field of service and provide for additional facilities. It has, therefore, been decided to construct an additional Hostel-cum-Programme Building at an estimated cost of Rupees Ten Lacs. To secure this sum we are appealing to the generous public. You will agree with me that this is a wise and sound investment.

A copy of certificate regarding "Rebate of Income Tax in the hands of donors under Section 13 B" of the Indian Income Tax Act will be of interest to donors. It would also interest them to know that the fund my committee is able to raise will be augmented by a substantial grant that is expected from the International Committee of Y. M. C. A's which is raising special funds to aid Y.M.C.A. Building Projects in India and elsewhere.

My Committee will be happy to name any part or portion of the proposed building, for which money is donated, after the name of the donor or his nominee.

I hope that my appeal for funds for an additional Y.M.C.A. building in New Delhi will have an adequate response which it so richly deserves.

Role of YMCA & its Leadership by Dr. R. Sweety Prem Kumar, PhD

India and Olympics: The recent Olympics 2020 at Tokyo, Japan 23 July to 8 August 2021 was a dream sports event for any sports enthusiast. This was followed by the Paralympics in Tokyo, Japan between 24 August and 5 September 2021. The first modern Olympics were held in Athens, Greece, in 1896. It took 28 years in 1924 for India to participate Olympics in Paris, France between 4 May to 27 July 27, 1924. During my tenure of three years as Correspondent and Secretary at YMCA College of Physical Education at Chennai, I had the opportunity of meeting a number of sports and games personalities, administrators, academicians, Olympians, and Paralympians.

Beginning of Olympic participation by India: Following the 1920 Olympics in Antwerp Dr. A.G. Noehren the National physical director of Indian YMCAs prepared the YMCAs for the promotion of the Olympic idea in India. The first Indian Olympic coach was Harry Crowe Buck, an athletic coach from Springfield College, Massachusetts, USA, founded in 1885, with the Young Men's Christian Association, and is known as the birthplace of basketball, which was invented there in 1891 by instructor James Naismith. Buck was the principal of the then YMCA Physical Education School Madras. The spirit to achieve the gold medal is missing. Who should motivate? Who should inspire? Want a foreigner? Buck's contribution to sports and games aka physical education in India is immense. His Book of Rules Published by the National Council of YMCAs in India is still the best and most popular in libraries. The college started tennis coaching with the help of Vijay Amirtaraj, a tennis legend.

Harry Crowe Buck was able to ignite the fire of sports competitiveness and led the team first time to the 1924 Olympics in Paris, France, and the spirit continued to win gold in 1928. It is a history to be remembered. In 1929 Buck launched the first sports journal in India, Vyayam, a quarterly. For hundred years of Olympic participation, we continue with a single gold medal, though with some misses in between. Olympics mean competition for countries who are already familiar with, and participation for new entrants. This is the level of achievement. Often I come across statements like 'best performing Olympic team'. For a sportsperson, the best performance is winning a medal in Olympics. Anything less is mediocrity.

Physical education and sports institutions and schools and colleges should be able to motivate and inspire. Mere mundane lectures are not enough to motivate. The curriculum should focus more on practical and may have to be revised in consultation with UGC or any other regulatory body. The Indian contingent for Tokyo Olympics 2020, consisted of 228 members, including 119 athletes to compete in 85 medal events. Sports inspiration started almost a century ago, and we people of 1.4 billion are proud to win 7 medals (gold-1, silver-2, and bronze-4) at 48th position in Tokyo 2020. We have also not forgotten to encourage and celebrate losers also. The 2020 Paralympic Games, was held in Tokyo, Japan between 24 August and 5 September 2021, and we are proud to win 19 medals (Gold-5, Silver-8, and Bronze-6), at 24th position.
